Education

Workintech, Full Stack Development
Program (6 months - 960 hours - 78 projects)
2026

Kadir Has University,
Electrical-Electronical Engineering
2020 - 2024

Languages

English, Advanced
Japanese, Beginner

Certificates

Front End Development, Workintech,
03.2026
Full Stack Development, Workintech,
05.2026
AWS Certified Cloud Practitioner, AWS,
10.2024

Additional Information

Military Service: Completed compulsory military service
Driving License: Class B (Active driver)

Enis Ata Erkol

Full Stack Developer | Software Engineer

Aspiring Full-Stack Developer with a Bachelor's degree in Electrical and Electronics Engineering. Completed a 6-month intensive Full-Stack Development program at Workintech, gaining hands-on experience in software development. Motivated by continuous learning, teamwork, and applying analytical engineering skills to real-world technology projects.

SKILLS

Front End: Javascript, React.js, Hooks, Context API, Redux, Axios, Yup, Jest, Cypress, HTML, CSS, Tailwind Css,

Back End: Java, OOP, Data Structures, Design Patterns, Maven, Spring Core, Spring Boot, Spring Data JPA, Spring Security, SQL, PostgreSQL, JUnit, Mockito, Git, .Net

Additional: Algorithms, Debugging, Deployment, Problem Solving, Figma, Teamwork

SOFTWARE PROJECTS

E-commerce Platform, Full Stack Dev. - React | Spring Boot [GitHub](#) | [Website](#)

- Designed a Spring Boot REST API powering a React frontend, with JWT-based authentication and role management.
- Built the product catalog, filterable listing, address/card management, and order creation end-to-end on PostgreSQL.

SPA-Teknolojik Yemekler, Full Stack Developer - React | Node [GitHub](#) | [Website](#)

- Developed a scalable food ordering platform using Bootstrap, and React, enabling users to customize meals and place pizza orders through an interactive interface
- Integrated RESTful APIs to dynamically fetch menu data and submit order configurations

Seesaw With Physics, Full Stack Developer - HTML | JS | CSS [GitHub](#) | [Website](#)

- Developed a simple seesaw simulation with **realistic physics calculations** using **JavaScript, HTML5, and CSS**
- Implemented interactive controls allowing users to experiment with different weight and balance scenarios

EXPERIENCE

Jet Teknoloji, Istanbul - Full-stack Developer 02/2025 - 11/2025

- Built an E-commerce and operations site with tech-stacks of **Next.js**, .Net, PostgreSQL, and maintained it.
- Designed and implemented **RESTful APIs** for order processing, production tracking, and inventory management
- Built dynamic and responsive UI components with **React (Next.js)**, improving user experience and workflow efficiency

Magicorn, Remote - DevOps Intern

06/2024 - 02/2025

- Assisted in monitoring and maintaining **CI/CD pipelines**, improving deployment reliability and automation workflows
- Worked with **Git-based version control systems**, managing branches, pull requests, and code integration processes
- Gained hands-on experience with **AWS cloud services**, including deployment, configuration, and basic infrastructure management

University of Twente, On-site - Project Intern

06/2023 - 09/2023

- Contributed to a wearable health device project focused on multimodal signal sensing and analysis for chronic disease monitoring.
- Established real time data transition between the wearable device and a Raspberry Pi using Python to collect sensor data.
- Processed and analyzed the collected signal data in Python to support chronic disease monitoring.
